

EMPLOYEE SPOTLIGHT

KEN SAUCIER

Office Engineer

Tell us a little bit about your professional strengths and your role at KKCS.

I bring excellent contract negotiation skills and am knowledgeable of change order review, processing, project start-up, and logistics. I am also proficient in scheduling, subcontractor coordination, permitting, processing owner billing, project close-out, and project certification. My current project is the Midfield Satellite Concourse at Los Angeles International Airport (LAX). In addition to my duties as Office Engineer, I am assigned as Area Manager for the remote Los Angeles Department of Water and Power (LADWP) Industrial Substation.

Over the course of your 20+ year career, which agencies have you worked with?

I have worked on large projects for Los Angeles World Airports (LAWA), Los Angeles Unified School District (LAUSD), Los Angeles Community College District (LACCD), and Santa Monica - Malibu Unified School District (SMMUSD).

What have you learned from your experience working with LAWA?

Working at LAX has been both challenging and rewarding. It has been a tremendous learning opportunity and I have learned that planning increases the opportunity for success.
