

EMPLOYEE SPOTLIGHT

VAHID SAEDI

Vice President

What made you pursue the construction management industry?

I actually started in this business as Project Control Engineer at a copper mining job. The rest is history.

What types of projects do you specialize in?

I am experienced in design-build and design-bid-build engineering, design, and construction in a variety of industries including transportation and transit, chemical and petrochemical, oil and gas, retail and light construction, wastewater treatment, and mining. I am also experienced in management and control of software development projects utilizing various system development life cycle approaches.

What has been the most challenging work or project you have been a part of? What did you learn?

The I-405 Project, having to deal with multiple agencies, stakeholders, and claims. The lessons learned is how to reduce and mitigate conflicts between the contract T&C and other specifications.

What is the best part of working at KKCS?

At KKCS, we're all a family and that's why it makes it easy to work for this company. At KKCS, we're people, not numbers.
